

INDICATIONS

Specially designed moisturizing solution preservative-free with cleaning action on contact lenses and optimal protection for the eyes.

In clinical trials of practicable suitability, it was found to be most suitable for all common gas-permeable, flexible hard lenses and all common hydrophilic soft lenses.

For whom is suitable?

The solution is recommended for persons with an increased tendency to develop greasy and smeary contact lens surfaces. It dissolves lipophilic substances and contaminants of the tear film. Ideal for prolonged daily wearing of contact lenses.

Instructions for use

Instill 1-2 drops per eye into the outer angle of the eyelids as needed. It may be used several times daily, even while wearing contact lenses.

WARNINGS:

- The solution must not be used if you are allergic to any of the ingredients. If the conjunctiva becomes red or other eye symptoms arise, you should immediately consult an eye doctor or contact lens specialist or the pharmacist.
- After opening, to avoid possible contamination of the product, the single-dose vial can be reclosed with its cap and the residue solution can be used within 12 hours; even the bottle can be reclosed with its cap and the residue solution can be used within 3 months.
- To prevent possible microbial contamination of the solution, do not touch the dropper tip of the bottle and the vial.
- If you cannot see as clearly as normal for a short while after using the solution, you should not drive or operate machines until your sight has returned to normal.
- Keep out of the reach of children.
- Consult your doctor for use during pregnancy, lactation and for children.
- The eventual treatment with ophthalmic drugs or other ophthalmic medical devices must be carried out under the supervision of a doctor who can evaluate possible interactions.
- In the event of any serious claims or incidents concerning the device, it is necessary to report the incident to the manufacturer and the competent authority of the Member State in which the user is established, to provide more information on the safety of this medical device.

COMPOSITION: Calcium chloride 1,8 mmol/l, Magnesium sulphate 0,81 mmol/l, Potassium chloride 5,37 mmol/l, Hyaluronic acid 0,075%, hydroxypropylmethylcellulose (HPMC) 0,05%, Tween 20, Sodium chloride, Boric acid, Sodium tetraborate decahydrate, purified water.
